To: All Affected Districts

Re: 2019/2020 Health Supplies Bid Award - Epi-Pens

Date: May 20, 2019

As with last year, attached is information regarding a special purchase program for School Districts that allows you to purchase Epi-Pens at a deeply discounted price. Therefore, we are not awarding Bid I.D. Numbers 1512078 and 1512079. You will find the Certification Form you need to use this program attached or by going to the following website:

http://www.epipen4schools.com/

Please contact our office if you have any questions.

EpiPen® (epinephrine injection, USP) and EpiPen Jr® (epinephrine injection, USP) Auto-Injectors

EpiPen 4-Schools

BioRidge Pharma facilitates the certification and fulfillment of the EpiPen4Schools orders.

Home (/)

The EpiPen 4 Schools Program is designed to provide access to epinephrine in the event a person experiences a life-threatening allergic reaction (anaphylaxis) in the school setting.

The program offers qualifying schools:

- **Four free EpiPen® (epinephrine injection, USP) or EpiPen Jr® (epinephrine injection, USP) Auto-Injectors** in the form of two EpiPen 2-Pak® cartons, two EpiPen Jr 2-Pak® cartons or one 2-Pak of each kind.
  
  *Note: schools may receive the authorized generic versions of EpiPen and EpiPen Jr*

- **Free replenishment product** in the event that the free supply is used to respond to a life-threatening allergic reaction.

- **A convenient storage unit**, the EpiLocker®, to store EpiPen 2-Pak® and EpiPen Jr 2-Pak® cartons received through the program.

- **How to Use an EpiPen® (epinephrine injection, USP) Auto-Injector** (/Members/Training/), containing instructions on how to use Mylan epinephrine auto-injectors.

- **EpiPen® Trainers**, which contain no drug product or needle, to practice administering EpiPen® Auto-Injector.

**CLICK HERE (/Members/OrderStep1/) to start your order.**

An estimated one in 13 children in the U.S. lives with a food allergy that puts them at risk for anaphylaxis—a considerable increase from previous years. Though avoidance of allergic triggers is the only way to prevent anaphylaxis, the fact is that life happens and it’s possible for someone to experience an accidental exposure or first-time reaction.

Epinephrine is the only first-line treatment for anaphylaxis. According to the food allergy guidelines developed by the National Institute of Allergy and Infectious Diseases, if experiencing anaphylaxis, a person should receive an intramuscular injection of epinephrine and seek immediate emergency medical care. Carrying an epinephrine auto-injector does not prevent patients from having an anaphylactic reaction; hence, patients must avoid their triggers at all times.

https://www.epipen4schools.com
For more information on anaphylaxis or EpiPen® Auto-Injectors, visit epipen.com (http://www.epipen.com).

**Did you know?**

Anaphylaxis can develop and progress quickly, and children and adolescents are among the most at risk. A survey of more than 8048 schools participating in EpiPen4Schools® revealed a total of 1,568 anaphylactic events among students and staff during the 2015-2016 school year. Also, the survey found:

- More than **one in four** anaphylactic events occurred in the absence of an established or known allergic trigger
- In 17% of reported anaphylaxis cases, the individual was not treated with epinephrine, the **only** first-line treatment for anaphylaxis
- In those events where an epinephrine auto-injector was used, **nearly 60%** were treated with an EpiPen® Auto-Injector provided by the EpiPen4Schools® program

* A school will only receive epinephrine auto-injectors in accordance with all applicable laws. A school must submit a valid prescription in order to qualify for this program.

**Indications**

EpiPen® (epinephrine injection, USP) 0.3 mg and EpiPen Jr® (epinephrine injection, USP) 0.15 mg Auto-Injectors are for the emergency treatment of life-threatening allergic reactions (anaphylaxis) caused by allergens, exercise, or unknown triggers; and for people who are at increased risk for these reactions. EpiPen® and EpiPen Jr® are intended for immediate administration as emergency supportive therapy only. Seek immediate emergency medical help right away.

**Important Safety Information**

Use EpiPen® or EpiPen Jr® Auto-Injectors right away when you have an allergic emergency (anaphylaxis). **Get emergency medical help right away.** You may need further medical attention. Only a healthcare professional should give additional doses of epinephrine if you need more than two injections for a single anaphylactic episode. EpiPen® or EpiPen Jr® should **only** be injected into the middle of your outer thigh (upper leg), through clothing if necessary. Do not inject into your veins, buttocks, fingers, toes, hands or feet. Hold the leg of young children firmly in place before and during injection to prevent injuries. In case of accidental injection, please seek immediate medical treatment.

Rarely, patients who have used EpiPen® or EpiPen Jr® may develop an infection at the injection site within a few days. Some of these infections can be serious. Call your healthcare professional right away if you have any of the following at an injection site: redness that does not go away, swelling, tenderness, or the area feels warm to the touch.

https://www.epipen4schools.com
Tell your healthcare professional about all of your medical conditions, especially if you have asthma, a history of depression, thyroid problems, Parkinson's disease, diabetes, high blood pressure or heart problems, have any other medical conditions, are pregnant or plan to become pregnant, or are breastfeeding or plan to breastfeed. Be sure to also tell your healthcare professional all the medicines you take, especially medicines for asthma. **If you have certain medical conditions, or take certain medicines, your condition may get worse or you may have longer lasting side effects when you use EpiPen® or EpiPen Jr®.**

Common side effects include fast, irregular or "pounding" heartbeat, sweating, nausea or vomiting, breathing problems, paleness, dizziness, weakness, shakiness, headache, feelings of over excitement, nervousness or anxiety. These side effects usually go away quickly if you lie down and rest. **Tell your healthcare professional if you have any side effect that bothers you or that does not go away.**

For additional information, please contact us at 800-395-3376.

You are encouraged to report negative side effects of prescription drugs to the FDA.

Visit www.fda.gov/Safety/MedWatch/ or call 1-800-FDA-1088.
CERTIFICATION FORM:
Free Authorized Generic for EpiPen® (epinephrine injection, USP)
Auto-Injector Authorized Generic for EpiPen4Schools® Program

The school and/or school district identified below (the "School") hereby acknowledges and agrees that
the Free Authorized Generic for EpiPen® (epinephrine injection, USP) Auto-Injector Authorized Generic for
EpiPen4Schools® Program made available by Mylan ("Mylan") to the School is because it is a school and is
conditioned upon the undersigned making this certification to Mylan.

The School represents and warrants to Mylan that:
(i) all of the information provided in this certification is true, complete and accurate;
(ii) the School will only receive Authorized Generic for EpiPen® (epinephrine injection, USP)
0.3mg and Authorized Generic for EpiPen Jr® (epinephrine injection, USP) 0.15mg Auto-
Injectors in accordance with all applicable laws for use by the School, and the School has
presented a valid prescription for the product;
(iii) the School is an entity whose primary purpose is education for students in grades K
through 12 that is licensed as an educational facility under all applicable laws;
(iv) the School shall make best efforts to provide appropriate product training to any School
personnel who may administer an Authorized Generic for EpiPen® or Authorized Generic
for EpiPen Jr® Auto-Injector;
(v) the person signing this certification on behalf of the School has the requisite authority to
make this certification on behalf of the School identified below;
(vi) such Authorized Generic for EpiPen® Auto-Injectors received by the School shall be for its
own use and the School shall not sell or transfer any such Authorized Generic for
EpiPen® Auto-Injectors received pursuant to the Free Authorized Generic for EpiPen®
Auto-Injector Authorized Generic for EpiPen4Schools® Program to a non-school third
party, unless the prior written approval of Mylan, in its sole discretion, is obtained;
(vii) any transfer of any quantity of Authorized Generic for EpiPen® Auto-Injectors received
pursuant to the Free Authorized Generic for EpiPen® Auto-Injector Authorized Generic for
EpiPen4Schools® Program available to schools in violation of this certification will be
considered a breach of this certification allowing Mylan to prohibit the School from
receiving Authorized Generic for EpiPen® Auto-Injectors pursuant to the Free Authorized
Generic for EpiPen® Auto-Injector Authorized Generic for EpiPen4Schools® Program
available to schools;
(viii) neither the School, nor any healthcare professional associated with or providing medical
services on behalf of the School, will bill any patient or any third-party payer/government
program for any free Authorized Generic for EpiPen® or Authorized Generic for EpiPen
Jr® Auto-Injector administered to any patient; and
(ix) the School agrees to Mylan’s use of the School's name for promotional purposes.

Please input the number of Authorized Generic for EpiPen 2-
Pak® and/or Authorized Generic for EpiPen Jr 2-Pak® cartons
below.

Authorized Schools are eligible to receive four Authorized Generic for EpiPen® Auto-Injectors in the form of
two Authorized Generic for EpiPen 2-Pak® cartons; or two Authorized Generic for EpiPen Jr 2-Pak®
cartons; or one of each 2-Pak cartons. Total quantity ordered must be no more than two 2-Pak cartons.

☐ Please check if you would like to receive periodic updates about this program or Authorized Generic for EpiPen®
Auto-Injector.

EPI-2017-0172
Please note there are two auto-injectors per Authorized Generic for EpiPen 2-Pak® or Authorized Generic for EpiPen Jr 2-Pak®. Example: If you wish to order two Authorized Generic for EpiPen® Auto-Injectors and two Authorized Generic for EpiPen Jr® Auto-Injectors, put the number “1” in the Quantity Ordered box next to Authorized Generic for EpiPen 2-Pak® and “1” in the Quantity Ordered box next to Authorized Generic for EpiPen Jr 2-Pak®. If you wish to order four Authorized Generic for EpiPen Jr® Auto-Injectors, put the number “2” in the Quantity Ordered box next to Authorized Generic for EpiPen Jr 2-Pak® and 0 (zero) in the Quantity Ordered box next to Authorized Generic for EpiPen 2-Pak®.

† ORDERING FOR MULTIPLE SCHOOLS: If you are ordering for multiple Schools within a single school district, you may order up to two 2-Pak cartons per school. Please provide a list of all the Schools for which you are ordering product if ordering for multiple Schools, including the name and address of each School. For example, if you are ordering two Authorized Generic for EpiPen Jr 2-Pak® cartons for each of 10 Schools, you should enter 20 in the Quantity Ordered column next to Authorized Generic for EpiPen Jr 2-Pak® cartons. Under this scenario, your total quantity ordered cannot exceed the number of Schools multiplied by 2.

If the terms and conditions provided in this certification are amended, modified or altered in any way, it will be considered null and void.

Epinephrine Standing Order Protocol

I, the undersigned Physician, for the purpose of facilitating the use of epinephrine in the case of anaphylaxis, a life-threatening allergic reaction, in individuals and in compliance with all applicable state laws and regulations, issue this epinephrine standing order Protocol ("Protocol") on the following terms:

**Physician License:** I represent that I: (a) am licensed to prescribe legend drugs in this state as set forth below; (b) am qualified to practice medicine in this state; and (c) am in good standing with the appropriate professional licensing board.

**Epinephrine:** This Protocol constitutes my standing order for the treatment of anaphylaxis and the use of epinephrine in emergency situations as further described below in a school setting.

**Delegation:** I, the undersigned Physician, delegate authority to all appropriate medical and school personnel employed by or acting on behalf of the below described school system.

Issued to:

Name of School/District

Street Address

City, Zip Code

**Standing Order:** All appropriate medical and school personnel (including, but not limited to, any Registered Nurse) employed by or acting on behalf of the school system may administer epinephrine via an undesignated epinephrine auto-injector to an individual using professional judgment if an individual is experiencing a potentially life-threatening allergic reaction (anaphylaxis).

**Emergency Treatment Procedures:** The following treatment protocol will be utilized to manage anaphylactic reactions. Anaphylaxis is a life-threatening allergic reaction that is rapid in onset.

1. **Dosage:** If conditions of anaphylaxis are developing or present themselves, administer epinephrine USP as epinephrine auto-injector, EpiPen® (epinephrine injection, USP) or EpiPen Jr® (epinephrine injection, USP) auto-injector, intramuscularly into the anterolateral aspect of the thigh (through clothing if necessary). Selection of the appropriate dosage strength (EpiPen® 0.3 mg or EpiPen Jr® 0.15 mg) is determined according to patient body weight, as discussed in the product labeling.
   a. For individuals 33 to 66 pounds, use one EpiPen Jr® (0.15 mL epinephrine injection, USP, 1:2000) auto-injector to deliver 0.15 mg of epinephrine injection, USP.
   b. For individuals approximately 66 pounds and greater, use one EpiPen® (0.3 mL epinephrine injection, USP, 1:1000) auto-injector to deliver 0.3 mg of epinephrine injection, USP.

2. **Frequency:** Up to 20% of individuals who receive epinephrine will require more than one dose before symptoms are alleviated. More than two sequential doses of epinephrine for the same episode should be administered only under direct medical supervision.

3. **Referral:** The individual must be referred to a physician for medical evaluation, even if symptoms resolve completely. Symptoms may recur after the epinephrine wears off, as much as 24 hours later.

4. **Documentation and Notification:** Document the details of the incident and notify the individual's parent, guardian, or caretaker and primary care physician in accordance with school policy.

In every case, emergency services must be contacted as soon as possible by calling 911 or local emergency medical services.

Please review the attached prescription:

<thead>
<tr>
<th>Strength</th>
<th>Quantity Requested</th>
</tr>
</thead>
<tbody>
<tr>
<td>0.3mg EpiPen 2-Pak®</td>
<td></td>
</tr>
<tr>
<td>0.15mg EpiPen Jr 2-Pak®</td>
<td></td>
</tr>
</tbody>
</table>

*Please note there are two auto-injectors per EpiPen 2-Pak® or EpiPen Jr 2-Pak®. Example: If you wish to order 100 EpiPen® Auto-Injectors and 80 EpiPen Jr® Auto-Injectors, put the number 50 in quantity requested box next to the 0.3mg EpiPen 2-Pak® and 40 in the quantity requested box next to the 0.15mg EpiPen Jr 2-Pak®.

**Indications**
EpiPen® (epinephrine injection, USP) 0.3 mg and EpiPen Jr® (epinephrine injection, USP) 0.15 mg Auto-Injectors are indicated in the emergency treatment of type 1 allergic reactions, including anaphylaxis, to allergens, idiopathic and exercise-induced anaphylaxis, and in patients with a history or increased risk of anaphylactic reactions. Selection of the appropriate dosage strength is determined according to body weight.

**Important Safety Information**
EpiPen® and EpiPen Jr® Auto-Injectors are intended for immediate administration as emergency supportive therapy only and are not intended as a substitute for immediate medical or hospital care. In conjunction with the administration of epinephrine, the patient should seek immediate medical or hospital care. More than two sequential doses of epinephrine should only be administered under direct medical supervision.

EpiPen® and EpiPen Jr® should only be injected into the anterolateral aspect of the thigh. Do not inject intravenously, into buttock, or into digits, hands, or feet. Instruct caregivers to hold the leg of young children firmly in place and limit movement prior to and during injection to minimize risk of injection-related injury.

Rare cases of serious skin and soft tissue infections have been reported following epinephrine injection. Advise patients to seek medical care if they develop symptoms of infection such as persistent redness, warmth, swelling, or tenderness at the injection site.

Epinephrine should be used with caution in patients with heart disease, and in patients who are on drugs that may sensitizze the heart to arrhythmias, because it may precipitate or aggravate angina pectoris and produce ventricular arrhythmias. Arrhythmias, including fatal ventricular fibrillation, have been reported, particularly in patients with underlying cardiac disease or taking cardiac glycosides, diuretics, or anti-arrhythmics.

Patients with certain medical conditions or who take certain medications for allergies, depression, thyroid disorders, diabetes, and hypertension, may be at greater risk for adverse reactions. Common adverse reactions to epinephrine include anxiety, apprehensiveness, restlessness, tremor, weakness, dizziness, sweating, palpitations, pallor, nausea and vomiting, headache, and/or respiratory difficulties.

Please see the full Prescribing Information and Patient Information.

You are encouraged to report negative side effects of prescription drugs to the FDA.

Visit www.fda.gov/medwatch or call 1-800-FDA-1088.

For additional information please contact us at 800-395-3376.
